Letter.

Ref. No. H - 643

Hubli 28th Aug ' 1947.

The Deputy Secretary to the Government of
Bombay, Public Works Department.

Subject. Utilisation of Jog-Power.

My committee would like to invite a reference to the correspondence ending with your letter No.2004/36- El- dated 23rd April 1947 and have to enquire if any progress has been made in securing Jog-power to Karnatak Districts. The findings of Dr.B.K.R.Prasad. M.A.(Hon) D.Sc., Superintending Engineer (Hydro) who made a load survey of Dharwar and Karwar districts in the last week of April 1947 must have been submitted to Government by this time. It would be interesting to know the action taken by Government on his report. A copy of the report may please be supplied.

An early reply will greatly oblige.

2. The Karnataka Chamber of Commerce. enquires what action has been taken on Dr Ram Prasad's report on the utilisation of power from the Jog Falls and requests for a copy of the report.

3. The report is under submission to the H.M. P.W.D. The Chamber may be informed that it is under consideration of Govt.

4. The report is mainly intended for Govt use. Presumably as in respect of the previous survey a press note indicating the findings of Dr Ram Prasad & the conclusions reached by Govt will be issued when a decision is reached on the Report. It is for consideration whether the Chamber may be informed accordingly.

Ref. No. H - 777

Hubli 7th Oct' 1947.

The Hon'ble Minister for Works, Mines and
Power to the Government of India., New-Delhi.

Subject: Utilization of Jog-Power.

Sir,

My committee have to submit the following for your serious consideration on the above subject:

The attention of my committee has been drawn to your statement made at Poona regarding Narmada-Tapti Project, enunciating in particular, the policy of the Government of India with regard to power-schemes. My committee fully appreciate the soundness of Goverment's policy towards financing and expediting power schemes. It is common knolwdge that without cheap and adequate power the industrial and agricultural production and consequently the economic reconstruction of this country is simply not possible. And it would not be out of place to observe here that there has been a lot of talking and paper planning on the part of the provincial and central Governments without any visible effort of bringing the schemes into practice. Your statement that Government of India will assist all power schemes with funds and technical personnel irrespective of the cost involved is , indeed, assuring.

My committee have no doubt that the Government of India fully realise that without the cooperation of the provincial Governments and in particular the Govt of

the Govt of Bombay who glorify themselves in ~~issuing sermons on the Mount~~. They have been simply sleeping over ~~xxxxx~~ schemes of power generation. When other provincial Governments, for example the Madras Government are making headway, our Bombay Govt have infinite capacity and energy in 'investigations' which will never end or probably will come to a dead end. The inertia, red-tapism, inefficiency and possible unwillingness to expedite schemes likely to benifit Karnatak in case of the Government of Bombay are indeed, remarkable. When the Govt of Madras have placed orders for electrical plant worth 2 crores of Rupees, the Bombay Government are yet to secure - additional plant for the Hubli Electric Supply costing only 6 lakhs of Rupees and they have been doing it since the last 2 years. What a telling example of redtapism and inefficiency. When the Madras Govt have put lines to take Jog-Power to the Tunga-Bhadra Project, the Bombay Government are 'investigating' by sending ~~xxxxx~~ officers seasonally, and wasting public funds.

My committee would like to lodge complaint and protest to the Government of India against the Bombay Government for their lethargy, indifference and negligence in expediting power projects concerning Karnatak. My committee, therefore request the Govt of India to instruct the Bombay Govt to ~~finalise~~ Jog-Scheme without any delay. My committee are aware that it is entirely the concern of the provincial Government but non-~~interference~~ interference by the Government of India in provincial matter, when a provincial Government singularly fails in its duty, on technical grounds, may lead to lopsided developments and the fine sentiments expressed by the Hon'ble Minister will remain only as such.

My committee trust that the Government of India will be pleased to consider this representation seriously and give necessary instructions to the Government of Bombay.

C.W.C. to Govt of Bombay, P.W.D. for information.

Yours faithfully,
R.K. Iyer
Hony. Secretary.

El.Br.

Submitted for information.

2. The Karnatak chamber of commerce complaints to the G.of I. that the Bombay is lethargic, indifferent and negligent in expediting power projects concerning Karnatak.

3. So far as Karnatak is concerned Govt. has under its consideration two Power Projects; viz. the utilisation of hydro electric power from the Jog Falls to be purchased from the Govt.of Mysore and the Kalinadi Hydro electric project.

4. The question of utilisation of Jog power to the best advantage of the Southern part of the Province has been engaging the attention of Govt. some time past. A preliminary survey in this connection was made by the Grid Deptt. early in 1947 and a press note was issued in April 1947 indicating the conclusions reached as a result of that survey. Since then under instructions from the H.M.,P.W.D. Dr.Ram Prasad of the Electric Grid Deptt. investigated the possibility of supplying Jog power with ref. to the existing load. The report of Dr.Ram Prasad is under submission to the H.M.,P.W.D. for orders.With reference to the chamber's recent enquiry in the matter it was informed that the report of Dr.Ram Prasad has been received and is under consideration of Govt.

Preliminary survey work connected with the Kalinadi hydro project was sanctioned by Govt. on 7-1-47. This work has been entrusted to a private agency viz.Messrs.Associated Consulting Engrs.(India) Ltd. and their full report on the possibilities of power generation from the Kalinadi and its tributaries is expected by the end of this year. The progress made in connection with this survey was recently...

recently announced in a press note.

No major schemes can be taken up unless their feasibility is fully investigated both economically and technically.

5. As regards the remarks of the chamber reg: addl. plant for the Hubli Electric Supply it is noted that the the undertaking was being managed upto May 1944 by the Hubli Ely.Co.,Ltd. to whom a license was granted under the I.E.Act 1910. Since the licensee was managing it very inefficiently the license was revoked by Govt. in May 1944 and the management of the undertaking was taken over by Govt. Soon after that Govt.ordered out 150 kW. set at the cost of nearly one lakh of rupees and installed it to make some improvement in the supply. This additional supply was however totally inadequate to meet the growing demand for electricity at Hubli. Govt. has therefore decided to install two additional sets of 500 kW. capacity each and the El.Engr.to Govt. has been asked to invite tenders for the same publicly and at the same time carry on negotiations with the India Supply Mission in Washington re: the availability of the sets in U.S.A. and their terms of delivery etc. so that the plant may be obtained from the source which offers the earliest possible supply date commensurate with cost. With ref. to the Chamber's recent enquiry in the matter it was informed that Govt. has taken the necessary steps to obtain the plant as quickly as possible.

6. From the above it will be seen that Govt. is fully alive to the needs of the Karnatak people and there is no lethargy, indifference and negligence in expediting the power projects as alleged by the chamber.

7. It is for consideration whether we need inform the Govt.of India on the above lines at this stage. Presumably the G.of I. may invite our remarks on the Chamber's representation

VS 4/36

43102

and we may then reply if approved.

Secy (I)

H M P W D

The O.N. explains the present position re: electrification of Karnataka. Govt is fully alive to the necessity of doing something for this part of the Province & is doing its best by cutting off a large amount of formalities & routines. In the face of these facts a letter like the present one from a responsible body like the K. Chamber of Commerce shd be considered very unwarranted.

At any case there was no necessity for the Ch. to be so rude & impolite in their letter to Govt of India.

I think we need not reply at this stage

2. File No 2004/36/43102, containing the previous letter of the Karnataka Chamber of Commerce is under submission to the H.M. P.W.D. since 27th Oct 1947. The Chamber's letter is addressed to the Govt. with a copy to this Govt. So far as office remembers the Chamber has criticised therein the Provl Govt for its alleged slowness in taking up the development of Karnataka and has requested the Central Govt to expedite the Provl Govt in the matter of utilisation of Jog Power. No specific action was considered necessary unless the Govt. asked for any information with reference to the letter in question.

3. It seems that the Chamber is awaiting for a reply from this Govt & the necessary draft reply will accordingly be put up

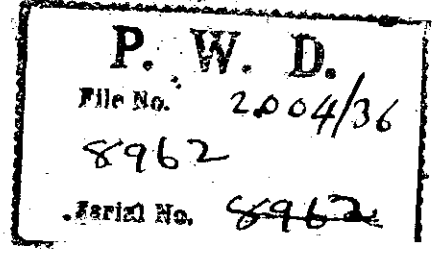
E(2)



Krnataka Industrial Association, Gadag.

1. This meeting regrets to note that the Govt. of --- Bombay and Indian Union both are neglecting the Industrial and -- Agricultural development of Karnataka. In this conection we bring to the notice of both Govt. the neglected supply of Gersappa --- Electricity which is available immediatly.(ready for work.)

In the post war reconstruction crores of rupees are - spent in other parts of the country; but in Karnataka when the -- whole of the public of Karnataka points out to supply of Gersappa power for supply of Agricultural and Industrial development of this part, the cry is waisted in the wilderness.

So once again this meeting regrets and strongly -- desires to press upon both the Govts. for the supply of Electric power for the economical upliftment of Karnataka through Industrial development of this part.

2. This meeting regrets to note the expression of -- Pandit Jawaharlal Neharu in Delhi Assembly about formation of .... Karnataka Provinee.

3. This meeting urges upon Union Govt. to give scope -- for the formation of Karnataka Provinee in the new constitution - only.

m Formation of Karnataka is the only way to raise the standard of Karnataka people, Politically, Socially and Economic--ally.

In case it is not possible to form Karnataka Provine with the new constitution this meeting suggests the Provincial M.L As', Constituent Assembly Members and A.I.C.C.Members to tender -- their resignations.

Hangal Taluka Rayats have passed a resolution at a meeting held on 21-6-47 that the Bombay Govt. should make arrangements to supply electricity produced at the Jog falls Hydroelectric Works to Hangal Taluka via Sirsi for agricultural, irrigation and industrial purposes. The meeting has authorized Mr. Kallappa, M.L.C. and five others to wait in a deputation on H.M., Agre. H.M., P.W.D and H.P.M. to discuss the possibility of such an arrangement etc.

4/7/47.

H.P.M.

On 21st June 1947 a meeting of the Hangal taluka nayaks had met under the President-ship of mr. Narashingrao Desai Kallapur M.L.C. The numb was more than 1000, and they have passed the following resolutions about the electricity which being produced at Gerusoppa-water fall.

1) "ಜೋಗದ ಜಲಪಾತದಲ್ಲಿ ಕುಡ್ಲುವ ವಿದ್ಯುಚ್ಛಕ್ತಿಯನ್ನು (electricity) ಸಿವಿಲ್ ಸಂಸ್ಥಾನದಲ್ಲಿ ಹಾನಗಲ್ಲ ತಾಲೂಕಿಗೆ. ಶಿರಸಿ, ಬನವಾಸಿಗಳಿಗೆ ಸಹ್ಯ ಬೆಲೆಯಲ್ಲಿ ಕೊಡಬೇಕಾಗಿ ಅಲಂಬೋಗಕ್ಕಾಗಿ. ಆ ಕಂಪನಿಯವರು ನಿಮ್ಮ ಕೋರಿಕೆಯನ್ನು ಸಂಪೂರ್ಣವಾಗಿ ಪರಿಶೀಲಿಸಿ ಸಾಧ್ಯವಾದಷ್ಟು ಕಡಿಮೆ ಬೆಲೆಗೆ ಕೊಡಬೇಕೆಂದು ಸರಕಾರದಿಂದ ಬರೆಸಿ ಕೊಳ್ಳಬೇಕು."

ಎಂದೂ ಸಂಸ್ಥಾನವು ಮಾಡಿದಾರಾ ಕಾನೂನುಗಳು. ಕರಾಸ್ಥರು ಮುಂಡಿಮುಂಡಿಕಾಲಕ್ಕೆ ಬಿ. ಸಿದ್ಧಲಿಂಗಪ್ಪ ಹಂದ್ರಾಳ ಬಂಧುಗಳು ಈ ವಿಷಯಗಳಲ್ಲಿ ಸಹಕಾರಿಸಿದರು.

ಹಾನಗಲ್ಲ ತಾಲೂಕಿನಲ್ಲಿ ಸು೦೦೦೦ ಎಕರೆ ಭೂಮಿ ಇದ್ದು ಇದಕ್ಕೆ ನೀರನ್ನು ಇಷ್ಟು ಅರಳಲ್ಲಿ 10 ಸಾವಿರ ಎಕರೆ ಧನಸಾಲಿಯಿಂದ ತೆಗೆಯುವುದಾಗಿದೆ. ಮಾಳಿ ಉಳಿದ 40000 ಎಕರೆ ಭೂಮಿಗಾಗಿ 20000 ಸಾವಿರ ಎಕರೆಗೆ ಮುಂದಿನ ಯೋಜನೆಯಲ್ಲಿ ಕೊಡಬಹುದೆಂದು ತಿಳಿಸಿದ್ದಾರೆ. ಮಳೆಗಾಲದ ದಿನಗಳಲ್ಲಿ ಇದಕ್ಕೆ ನೀರನ್ನು ತೆಗೆಯಲಿಕ್ಕೆ ಕೋರಿಕೆ ಇಲ್ಲವೆಂದು ತಿಳಿಸಿದ್ದಾರೆ. ಉಳಿದ 20000 ಎಕರೆ ಕೇವಲ ಮಳೆಗಾಲದಲ್ಲಿ ಸಾಧ್ಯವಾಗುವಂತೆ ಮಾಡಲು ಚಿಂತನೆ ಮಾಡಿದ್ದಾರೆ. ಇದಕ್ಕೆ ಕೆಲವು ಕಾಲುವೆಗಳನ್ನು ಕೊರೆಯಬೇಕಾಗಿದೆ. ಇದಕ್ಕೆ ಸುಮಾರು ಒಂದು ಕೋಟಿ ರೂಪಾಯಿ ಖರ್ಚಾಗಬಹುದೆಂದು ಅಂದಾಜು ಮಾಡಿದ್ದಾರೆ. ಇದಕ್ಕೆ ಸಂಬಂಧಿಸಿದ ಕೆಲಸಗಳು ಪ್ರಾರಂಭವಾಗಿವ

ಅವಶ್ಯಕತೆಯ ಕಾರಣ ಜಾಸ್ತಿಯಾದ ಕೆಲಸಗಾರರಿಗೆ ಕೊಡಬೇಕಾಗಿದೆ. ಕಾರಣ ಹೊಲದ
ಕೆಲಸಕ್ಕೆ ವಿದ್ಯುತ್ ಶಕ್ತಿಯನ್ನು (electricity) ಉಪಯೋಗಿಸುವುದರಿಂದ ಬಹಳ ಲಾಭಕರವಾಗಿದೆ.

58

2) ಕೃಷಿಯ ಉತ್ಪನ್ನವನ್ನು ಸಂಬಂಧಿಸಿದ ಮಾರುಕಟ್ಟೆಯ ಕಡೆಗೆ
ಹೊಸ ರೀತಿಯಲ್ಲಿ ಸಾಗಿಸಲು ಹೊಸ ಹೊಸ ಬಸ್ಸು ಲಾರಿ ಮೊದಲಾದ ಸೌಕರ್ಯವನ್ನು
ಕಲ್ಪಿಸಿಕೊಡಬೇಕೆಂದು ಈ ಕೆಳಗಿನಂತೆ ಸೂಚಿಸುತ್ತಾರೆ.

1) ಹೊಲಗಳು. ಪರಸ್ಪರ ಸಂಪರ್ಕವಾಗುವ ರೀತಿಯಲ್ಲಿ ಕಚ್ಚಾರಸ್ತೆಗಳ M.L.C.

2 " ಪಕ್ಕದ್ದಾಗಿ ಹಾದುಹೋಗುವ ಮಾರುಕಟ್ಟೆಗಳ.

3 " ಸಾಮಾನ್ಯವಾಗಿ ಸೇರುವಂತಹ ಸ್ಥಳಗಳಿಗೆ
ಹೋಗಬೇಕಾಗಿದೆ.

4 " ಸಣ್ಣ ಸಣ್ಣ ಒಳ್ಳೆ ಶೆಡ್ಡುಗಳು ಆ.ಕಾ. ಕಾರ್ಯಾಲಯ.
ಹೋಗಬೇಕಾಗಿದೆ.

5 " ಸಣ್ಣ ಸಣ್ಣ ನಾಯಕ ಲಕ್ಷ್ಮಿ ಅಲುಗಾರ.

6 " ಬಂಡಿಯಾಗಿ ಕೆಲಸಮಾಡಲು ಹೋಗಬೇಕಾಗಿದೆ.

—

ಈ ಕಾರಣ ಮೇರಿಗೆ ಸಂಬಂಧಿಸಿದ ಮಾನ್ಯರಿಗೆ
ದಶೆ :—

It was resolved unanimously that the Govt. of Bombay should be requested to supply electricity from Jog Falls to the Hanagal Taluka via Sirsi for Agricultural and Industrial purposes for the following reasons.

Out of the 50,000 acres of land in the Hanagal Taluka only 10,000 acres is at present irrigated by the Dharwa Canal. 20,000 acres of land is irrigated by small tanks. The remaining 20,000 acres of land is solely dependant upon rainfall. Some of this land is on the banks of Dharwa and Wardha rivers which flow in this Taluka. If pumping plants are installed to the deep portions of these two rivers it is possible to grow with certainty a variety of crops including sugarcane.

In addition

In addition to this there are 15 rice mills in this Taluka. One sugar factory has already been registered and there is likelihood of starting one more sugar factory and one silk factory in the Taluka. It will be very useful if electricity is supplied from the Jog falls.

2. The Hangal Taluka Rayat conference held at Adur on 19.5.47 has passed the following resn.

"This conference suggests to the B.P.B. to set up electric cable line from the Jog Hydro. electric works into Hangal Taluka so that lift irrigation of the water of the rivers Dharma & Wardha could be undertaken."

3. Yet another resn was passed by the Hangal Taluka Rayats on the 21.6.47 that Govt should be requested to supply electricity from the Jog Falls to the Hangal taluka via Sirsi for agricultural and industrial purposes.

4. These resns have been forwarded to Govt by Mr V.V. Patil, M.L.A & Mr N.S. Desai, M.L.C, respectively for consideration & action.

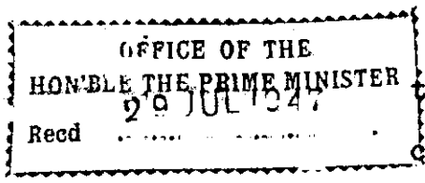
Subject:- Supply of electric energy from Jog falls
***

Sir,



We, the people of Hanagal taluka beg to place the following few lines for your kind and sympathetic consideration.

There are 15 rice mills in our taluka situated at Akki-Alur, Hanagal, Bommanhalli and Tilvalli which can take adventage of the supply of the electric energy if the line is taken via Hanagal.

There is about 50,000 acres of land under irrigation growing paddy and sugercane of which only 10,000 acres is under Dharma cannal and the rest is wholly depending upon rain water. As the rainfall in our taluka will be more for Kusgi crop and less for Tari crop, either the Kusgi or Tari crop fails every year. This electric energy can be used for this paddy area.

The Dharma cannal system is also being improved by Government. It is contemplated to establishment two - suger factories in this taluka, one near Akki-Alur & another near Lakkikop. Already one Company near Lakkikop is registered. The electric energy will be very much useful for the same.

About 8 to 10 thousand acres of land on either side of the rivers Varda and Dharma can be brought under irrigation if electric power is supplied for lift irrigation.

Sericulture can be developed if power is supplied.

We, therefore, request you to supply the electric energy from Jog falls at an early date and help us - to develop our taluka industrially and also from the -

Extract para. 2 of letter dated 14-12-1947 from Mr.N.S.Desai,M.L.C. Kallapur, Post Alur-Hangal, Dist. Dharwar, addressed to the H.M.,P.W.D. ~~xxxxxxxxxxxxxxxx~~

"2. Second demand of our Taluka is to help the industries of our Taluka by giving electricity from Jog at least upto our Taluka Via Shiddaour and Sirsi, the distance, being only 60 miles. I have heard your speech on this subject, that you are going to supply electricity to Karwar and Dharwar Districts from Malinadi, which will be supplied very soon. But in the same speech, if I remember, rightly you have said you are going to supply from Jog to such near stations where it can be supplied economically. So, I think our Taluka, will be nearer from Jog than from Kalinadi. So, I hope that you, kindly take up the work in this year's budget and oblige the people of this part."

5. Reg: su pply of electricity from the Jog Falls - para. 2 of Mr.Desai's letter attention is invited to the O.N. dated the 15-9-1947 on page 65 of file No.2004/36/36273. It will be seen therefrom that the probable power requirements of Hangal area have been ascertained by the El. Commr. and included in the load forecast for the proposals to utilise Jog Power. The decision of Govt. in respect of these proposals is awaited. Max No specific action is accordingly necessary on para. 2 of Mr. Desai's letter, beyond keeping a copy thereof with file No.2004/36/36273.

9.1.S.G.J.
16/1/48

...opy of Deputy Secretary's note dated the 23rd March recorded on the Register of Petitions.

I see no justification why some of these petitions should continue to be borne on the list of "pending" petitions. They pertain to Jog and Kalinadi Hydro-electric Projects. The latter report is expected in October 1948 which the reference is pending for about a year. I suggest that we should give final replies in such cases to the applicants, who should be asked to renew them after a few months or even years, when Government would have decided and carried out such large Projects as Kalinadi Hydro-Electric Project and would be in a position to comply with the request.

Please scrutiny the petitions over again and reply finally wherever necessary, without waiting for developments which will not ordinarily take place in 1948.

2. These pps. contain applications from the residents of Hangal Taluka for the supply of electric power to their place from the Jog power Scheme for the industrial and agricultural development of the area. They also suggest that the electric power would also help to undertake the lift Irrigation of the water of the rivers Dharma and Wardha. The probable requirements of the power in Hangal area for lift Irrgn, sugar factory, Rice Mills, small industries and domestic needs, have been incorporated in the load forecast for the proposals to utilize Jog power (vide El.Commr's u.o.r. at p. 29 ante). Vide in this connection o.n. at p.65 ante.

3. Attention is invited to para. 2 of today's O.N. in file No.2004/36/37717, wherein the position reg: the question of utilization of Jog power has been fully stated. In view of the position stated therein the draft letter put up may issue.

Subject:-Supply of electric power to Hangal from Jog Falls.

Dear Sir,

With reference to your letter, dated the 29th June 1947 addressed to the H.M. for P.W.D. forwarding a copy of the resolution passed in the meeting of Hangal Taluka Rayats on the 21-6-47, I am directed to state that the question of utilisation of Jog Power in the best interest of the Southern part of the Province and in the most economic way, is still under investigation of Govt. A Special Officer has been appointed to report on the industrial potentiality of the Dists. of Dharwar, Karwar, Belgaum and Bijapur. Preliminary investigations in connection with the Kalinadi Hydro Electric Project have been entrusted to M/s. Associated Consulting Engineers(India) Limited. When the reports of the Spl. Officer and of the Associated Consulting Engineers reg. Kalinadi Schemes are available, Govt. will give further consideration to the question of utilisation of Jog Power.

Yours faithfully,

D.A:-Nil.

Joint Memorandum presented to Dr. B.K.R. Prasad, Superintending Engineer, Bombay Hydro Electric Grid, Bombay, during his visit to Ranibennur, District Dharwar, by the Managements of the Joint Stock Companies of the place; Viz: The Ranibennur Ginning & Trading Co. Ltd., The Laxmi Narayan Manufacturing Co. Ltd., The Ranibennur Bil Industries Ltd., Ranibennur.

Sir,

We have great pleasure in welcoming you to this Town and express our deep debt of gratitude in accepting our invitation to visit this place amidst your crowded programme.

We beg to state sir, that we have been immensly pleased to read the announcement of the Government of Bombay about their immediate decision of making electric energy available to the South - Easterly Division of the Presidency, by out of the Jog Scheme, the arrangements of which have been finalised with the Government of Mysore

In this connection, we feel, we shall be failing in our duty if we do not acquaint you with the needs of the Locality and as such beg to lay before you and through you, to the Government of Bombay, the immediate necessity of supply of Electric Power to this area, base on the statistics so far gathered.

We beg to state, sir, that this Town is situated on the bord of the Bombay Mysore Boundary and on the Bangalore Poona Trunk and Rail Roads, with a population of over 25000 and with an elected - Municipal Body and is the Head Quarters of the Ranibennur Taluka. It has a vast hinterland of Black and Red soil, best suited to grow Cotton, Groundnuts and other Oil Seeds, in abundance, which has - sufficiently encouraged the Industrial Minded public and as a result of which, there are in existence 3 Cotton, Ginning and Groundnut - Decorticating Factories and of late, 2 Vegetable Oil Mills have sprun up. There has also been a joint and swift move to sponsor a Textile Mill, in view of the availability of superior grade cotton and other Raw Materials. All these Industries have not been progressing to the satisfaction of the concerned Industrialists in view of the non-availability of Electric Energy, which plays a fundamental part in the production, Maintainance and the successful running. Further, the achievement of these Industries have been very much hampered on account of the acute shortage of fuel in these parts on which they have to mainly depend. Given sufficient encouragement by the Government, in making Electric Power available, we may, with confidence hope to see that this Area can outbeat the neighbourinshood of the My Mysore State, which have been able to sponsor several Industries on account of the great advantage of power. The neighbouring parts of the Mysore State are not very well placed, compared to this Area in respect of Land, Raw Materials and Labour, but still, due to the - immense advantage and easy availability of Power, they have been able to go far ahead in the advancement of Industries.

Further, there has been sufficient awakening in the -

the Industrial Minded Public in this Area and Byadgi, a Town with a population of 12000, situated at a distance of 9 miles from this place and within the jurisdiction of this Taluka, has nearly 3 vegetable Oil Mills and 2 Ginning and decorticating Factories and several number of Rice and Flour Mills.

Further, coming to the point of Lift Irrigation on which the Government has very much stressed, we beg to state, that there are more than 300 gardens which are being cultivated on lift irrigation through water pumped, from out of the wells with the help of Diesel Oil Engines. The Scope for lift irrigation in this area, is very good and there has been a great awakening in the cultivating public who - have already adopted this scheme. It is, at the present, not possible to acquaint the Government with the needs of such cultivators, as the scheme is itself in its infancy, and the public are not very much enlightened on the use of Electric Power for their irrigation purposes. If sufficient propaganda is carried on by the Government through the concerned departments, we feel that the Government will be baffled to see its results.

There has also been the Flour Mill and Hand Loom Industries and there are more than 20/30 Flour Mills and more than 2/3000 Hand Looms in Ranibennur and Byadgi and almost every village is engaged in this. It will be striking to hear the sound of these, during the nights which continues till late upto midnight. Even these Industries are in the immediate need for Electric Energy.

In view of the above, we beg to impress on you to recommend to the Government of Bombay, the urgency of the need afor Electricity in this Area and to make available Power from the Jog Scheme through Harihar Sub Station. Though we can very well appreciate the difficulty the Government is to face in makin the scheme self-supporting still, taking into consideration the benefit that will be derived by the eage publi and the impetus to the progress and rapid development of Industries, which in this machine age, has been considered indespensable, the Government should spare no stone unturned to satisfy the long - awaited desire of the public in the Electrification of this Neglected Area.

A detailed approximate statistics of the po er required by the several bodies, has been attached separately, which will give you a fair idea of the immediate needs of this Area. We shall be very glad to enter into contract with the Government for our requirements, if we are called upon to do so.

We thank you Sir, for the cordial visit to this place and the assurance you have given us to recommend our case to the Government.

We beg to remain,
Sir,
Your Most Obedient Servants,

The Ranibennur Ginning & Trading Co. Ltd.,
The Laxmi Narayan Manufacturing Co. Ltd.,
The Ranibennur Oil Industries Ltd.

Below are the figures giving an approximate idea of Power required by this place immediately, based on the rough Statistics gathered - under different heads.

MAJOR INDUSTRIES.	Power required.
The Ranibennur Ginning & Trading Co. Ltd.	150 B.H.P.
The Laxmi Narayan Manufacturing Co. Ltd.	150
The Ranibennur Oil Industries, Limited.	175
A proposed Textile Mill to install about 12000 spindles and 300 Power Looms.	550
LOCAL BODIES.	
The Local Municipality will require about 200 B.H.P. for lighting the Streets, House Lighting and for other purposes like dranage etc.	200
IRRIGATION.	
300 gardens to lift water with 2½" pipes with an electric Motor of 3 B.H.P.	300
MINOR INDUSTRIES.	
Flour Mills and Hand Looms Factories. with 4/5 B.H.P. Motors.	200
T o t a l.	1275 B.H.P.

Joint Memorandum presented to Dr. B.K.R. Prasad, Superintending Engineer, Bombay Hydro Electric Grid, Bombay, during his visit to Ranibennur, Dharwar District, by the Managements of the Joint Stock Companies of the place; Viz. The Ranibennur Ginning & Trading Co. Ltd., The Laxmi Narayen Manufacturing Co. Ltd., The Rani bennur Oil Industries Ltd., Ranibennur.

Sir,

We have great pleasure in welcoming you to this Town and express our deep debt of gratitude in accepting our invitation to visit this place amidst your crowded programme.

We beg to state, sir, that we have been immensely - pleased to read the announcement of the Government of Bombay about their immediate decision of making electric energy --- available to the South Easterly Division of the Presidency, by out of the Joga Scheme, the arrangements of which have been finalised with the Government of Mysore.

In this connection, we feel, we shall be failing in our duty, if we donot acquaint you with the needs of the Locality and as such, beg to lay before you and through you, to the Government of Bombay, the immediate necessity of supply of Electrc -- Power to this area, based on the statistics so far gathered.

We beg to state, sir, that this Town is situated on the border of the Bombay Mysore Boundary and on the Bangalore Poona Trunk and Rail Roads, with a population of over 25,000 and with an elected Municipal Body and is the Head Quarters of the Ranibennur Taluka. It has a vast hinterland of Black and Red Soil best suited to grow Cotton, Groundnuts and other Oil Seeds, in abundance, which has sufficiently encouraged the Industrial Minded public and as a result of which, there are in existence 3 Cotton Ginning and Groundnut Decorticating Factories and of late, 2 vegetable Oil Mills have sprung up. There has also been a joint and swift move to sponsor a Textile Mill, in view of the availability of superior grade cotton and other Raw Materials. All these Industries have not been progressing to the satisfaction of the concerned Industrialists in view of the non-availability of Electric Energy, which plays a fundamental part in the production, Maintainance and the successful running. Further, the achievement of these Industries have been very much hampered on account of the acute -- shortage of fuel in these parts on which they have to mainly depend. Given sufficieht encouragement by the Government, in making Electric Power available, we may with confidence hope to see that -- this Area can outbeat the neighbourhood of the Mysore State, which have been able to sponsor several Industries on account of the great advantage of power. The neighbouring parts of the Mysore State are not very well placed compared to this Area in respect of Land, Raw Materials and Labour, but still, due to the immense advantage and easy availability of Power, they have been able to go far ahead in

in the advancement of Industries.

Further, there has been sufficient awakening in the Industrial Minded Public in this Area and Byadgi a Town with a population of 12,000 situated at a distance of 9 Miles from this place and -- within the jurisdiction of this Taluka, has nearly 3 Vegetable Oil Mills and 2 Ginning and decorticating factories and several number of Rice and flour Mills.

Further, coming to the point of Lift Irrigation on which the Government has very much stressed, we beg to state, that there are more than 300 Gardens which are being cultivated on lift irrigation through water pumped from out of the wells with the help of Diesel Engines. The Scope for lift irrigation in this area, is - very good and there has been a great awakening in the cultivating public who have already adopted this schme. It is at the presentnot possible to acquaint the Government with the needs of such cultivators, as the scheme is itself in its infancy, and the Publci are not very much enlightened on the use of Electric Power for their irrigation purposes. If sufficient propoganda is carried on by the Government through the concerned departments, we feelthat the Government will be baffled to see its results.

There has also been the Flour Mill and Hand Loom Industries and there are more than 20/30 Flour Mills and more than 2/3000 Hand Looms in Ranibennur and Byadgi and almost every village is engaged in this. It will be striking to hear the sound of these, during the nights which continues till late upto midnight. Even these - Industries are in the immediate need for Electrid Energy.

In view of the above, we beg to impress on you to recommend to the Government of Bombay, the urgency of the need of Electricity in this Area and to make available Power from the Hoga Scheme through Harihar Sub Stattion. Though, we can full well appreciate the difficulty the Government is to face in making the scheme self supporting still, taking into the consideration the benefit that will be derived by the eager public and the impetus to the progress and rapid development of Industries, which in this machine age has been considered --- indispensible, the Government should spare no stone unturned to ---- satisfy the long awaited desire of the public in the Electrification of this Neglected Area.

A detailed approximate statistics of the power required by the several bodies, has been attached separately, which will give you a fair idea of the immediate needs of this Area. We shall be very glad to enter into contract with the Government for our requirements, if we are called upon to do so.

We thank you sir, for the cordial visit to this place and the assurance you have given us to recommend our case to the Government.

We beg to remain,
Sir,
Your most obedient servants,

Electric Grid Offices.

16.5-'47

The memorandum presented by the management of the joint Stock Companies of Ranibennur was carefully examined by Dr.B.K.Ram Prasad, Superintending Engineer (Hydro) and personally discussed in a meeting of all the Industrialists of Haveri, Byadgi and Ranibennur, held at Byadgi on 4th May 1947 and the loads mentioned in the memorandum were modified wherever they were overestimated. The probable potential load at present would be of the order of 335 K.W.

2. Regarding textile mills, no specific data and prospectus are available about the floating of the new company, and whether a permit has been obtained from the Government of India. On the other hand, a prospect has been issued by Gowrishankar Industries of Byadgi for starting a textile mill with 20,000 spindles and 300 looms and this ~~enquiries~~ load has been included in the load statement for Byadgi. Enquiries at Ranibenn showed that it is very unlikely that there is room for another textile mill in that area. Hence, this extra load for a textile mill at Ranibennur has not been ~~k~~ taken into account in the load forecast.

3. A further note covering power supply from Jog to Haveri area & some other load centres such as Hanage Lekkikop and Savannur, was submitted to Government on 21-8-47. The approximate cost of this part of the estimate would be of the order of Rs.60 lakhs and the rate for energy sold, to make the scheme self-supporting at the end of 10 years' service would be about 1.38 a/unit at the 11 KV terminals on the basis of 0.2 a/unit being paid to the Mysore Govt. for energy purchased at the High Tension buses at Jog.

If only the Haveri area excluding Hanagal,

Savanur etc. is supplied with power from Harihar at Mysore-Bombay Boundary- by special arrangement with the Govt. of Mysore. the estimated capital cost would be about Rs.35 lakhs and the overall self-supporting rate at the end of 10 years would be 1.25 a/unit at the 11 KV terminals on the basis of energy supply of Mysore Govt. at 0.35/a/unit at Harihar.

The proposals include the possibility of securing a load of about 400 KW for large scale lift irrigation for the Tungabhadra and Warda rivers, which is yet to be confirmed by the concerned Dept.

4. Further action on this matter can only be taken after a decision has been arrived at by Government on the note on the use of Jog power which was submitted to Government on 21-8-47.

Copy of Deputy Secretary's note dated the 23rd March 1948, recorded on the Register of Petitions.

I see no justification why some of these petitions should continue to be borne on the list of "pending" petitions. They pertain to Jog and Kalinadi Hydro-electric Projects. The latter report is expected in October 1948 while the reference is pending for about a year. I suggest that we should give final replies in such cases to the applicants, who should be asked to renew them after a few months or even years, when Government would have decided and carried out such large Projects as Kalinadi Hydro-Electric Project and would be in a position to comply with the request.

Please scrutiny the petitions over again and reply finally wherever necessary, without waiting for developments which will not ordinarily take place in 1948.

2. These pps. deal with the applications from the Joint Stock Companies of Ranibennur in which a request has been made for the supply of electric power to Ranibennur and Byadgi Off Harihar for the industrial development of the area. It is also suggested therein that the electric power can be utilized for the Lift Irrign. for which there is ample scope in this area.

3. On the main case dealing with Dr. Ram Prasad's report on the utilization of Jog power it has been inter alia decided that in respect of the question of supplying Jog power in the Southern part of Dharwar Dist. viz. Haveri, Byadgi and Ranibennur and for Lift Irrign. Scheme on Tungbhadra River, Off Harihar, the Elec. Commr. should negotiate with the Mysore Govt. on the following points. He should find out (1) whether that Govt. will be prepared to supply 6000 KW at 66 KV bus bars at Harihar (2) if so, at what rate and (3) the minimum duration for which that Govt. would require a contract to justify any special arrangements that may have to be made to supply the above quantum of power at Harihar. The question will be considered further when the El. Commr's report is available. In the meanwhile the applicants may be informed as per draft put up for approval.

INDUSTRIAL ASSURANCE BLDG.
CHURCHGATE STREET
FORT, BOMBAY

30th April 1947

The Honourable Minister for P.W.D.,
Government of Bombay,
Bombay Castle,
Bombay.

Subject: Request for allotment of 1600 kW at Bagalkot, Electric power for Bagalkot Cement Scheme.

Sir,

During the course of an interview on the 10th instant, you were kind enough to tell me that the Government of Bombay had not yet finally made up its plans in the matter of distribution of electricity which it proposes to receive from the Jog scheme. You were further pleased to ask me to formulate my needs and make a definite request to the Government for supply of electric power needed by me.

1. Apart from my other energy needs for which I have independently applied, I stand in need of 1600 kW continuous load, at power factor 0.8, for the proposed cement company at Bagalkot. The Government of India have already granted me license to put up a cement plant of 100,000 tons a year at Bagalkot and I have been already allotted a quota for the manufacture of cement to this extent. At the present rate of progress, it is expected that the factory will start manufacture of cement at the end of three years from today.

2. The industrial development of Bagalkot, which otherwise combines all other conditions, is dependent upon supply of energy at a reasonable price. In all industrial schemes, coal plays an important part and for obvious geographical and transport reasons, regular supply of coal at competitive prices is quite a formidable problem. In all the calculations of cement production, the item of coal is generally calculated at about Rs. 30 per ton. We should have no hesitation in offering to buy from the Government our power needs at a rate, which when calculated, will cost us an equivalent of coal at Rs. 30 per ton. This rate can be safely placed at 0.75 anna per unit.

We are, therefore, willing to enter into an agreement with the Government of Bombay, to buy from them electric power at a flat rate of 3/4ths of an anna per unit, stipulating to buy 1600 kW continuous load at 0.8 power factor.

This represents our utmost limit. We should be thankful, however, if it should be possible for the Government to give us a more favourable rate in view of our very 'desirable' load. We should like to point out to the Government that our purpose in offering the above price is to be helpful to the Government in coming to a conclusion, regarding the rentability of a transmission line from Gadag-Hubli-Dharwar centre, to the town of Bagalkot which is only at a straight distance of 40 miles from Gadag itself.

3. We are also aware that Mr. B.V.Bhoomraddi contemplates putting up a spinning mill at Bagalkot and would need 800 kW electric power. We also know that Mr. S. S. Sakri from Bagalkot needs power to the extent of 400 kW for the three centres of Bagalkot, Ilkal and Guledgud. The town of Bagalkot itself would need 200 kW for the town purpose. This would put together add up to an aggregate load of 3000 kW. It is up to the Government to examine the various proposals for the supply of electric power at Bagalkot and arrive at their own conclusions in this matter.

We, for our own part, have not the least hesitation in requesting the Government for an allotment of 1600 kW for our cement factory. In fact, we strongly urge upon the Government the desirability of giving their earnest consideration to the necessity of transmitting power to Bagalkot and thus help the very promissing industrial development of this area.

Your obedient servant,

N P Jamsandekar

S. S. SAKRI,
BANKER & MERCHANT.

To,

The Honourable Minister for P.W.D.,
Government of Bombay,
Bombay Castle,
Bombay.

Sub: Request for allotment of 400kW in Bagalkot Area.

Sir,

I have been reliably informed that the Government of Bombay, with a view to encourage industry in the Karnatak part of our -- Province, is seriously considering proposals for laying a transmission line from Jog Hydro-electric Scheme to the important towns like Hubli, Dharwar and Gadag. I learn that Government have not yet definitely made up their mind for any particular transmission line. I learn from the papers that Dr. Ramprasad of the Electric Grid office is just now on a tour of Karnatak, in order to survey the whole area and assess the possibility of transmission of electric enrgy to the different centers in Karnatak.

I desire to submit the following proposals to the Government.

1. Should the Government think of coming as far as Gadag with their Transmission line, I strongly urge upon them to extend the line as far as Bagalkot. I have applied for electric licenses both for Guledgudd and Ilkal and have got strong interest for electric power for Bagalkot itself. For my own part, I am willing to enter into a definite agreement with the Government for receiving 400 kW continuous load at power factor 0.8 in the three places of Bagalkot, Guledgudd and Ilkal. I need 200 kW in Bagalkot itself, 100 kW in Guledgudd and 100 kW in Ilkal. The towns of Ilkal and Guledgudd would be on the straight line between Gadag and Bagalkot.

2. I learn that the Deccan Cements Company, who have been permitted by the Government of India to put up a a cement plant at Bagalkot, are negotiating with you to receive as much as 1600 kW. I also learn that Mr. Bhoomraddi, who proposes to launch a spinning mill at Bagalkot and of which I am a director, also needs electricity to the extent of about 1200 kW. The total load to be consumed at Bagalkot would therefore amount to 3200 kW. This load would be on

S. S. SAKRI,
BANKER & MERCHANT.

on the increase and one can safely assume that it may rise upto about 5,000 kW within 5 years after the transmission line has been laid down.

3. I have not made thorough calculations about the price of the electricity that we can afford to pay, but as I suppose that the Government policy would aim at supplying electricity as cheap as possible, I do not suppose that the Government would think of charging us more than .6 anna per unit. This would represent our utmost limit.

I request you, Sir, to give your earnest thought to my request for allotment of electricity and beg to remain,

Bagalkot,
Dated, 8th May 1947.

Your obedient servant,

Sakri.

DATE 8th May, 1947.

The Honourable Minister for P.W.D.,
Government of Bombay,
Bombay Castle,
Bombay.

Subject: Request for allotment of 1,000.kW for proposed Bagalkot Spinning Mill.

Sir,

We learn that the Government of Bombay shortly propose to make out definte plans about distribution of electricity which they expect to receive from the Jog Hydroelectric Scheme. We also learn that Government is examining a proposal to bring electricity as far as Hubli, Dharwar, and Gadag and that the Government Officer, Dr. Ram Prasad is actually on tour of Karnatak to investigate this question.

We wish to bring to your notice that we have already applied for allotment of quota for putting up a spinning mill at Bagalkot, and our application to the Central Government has been strongly recommended by the Government of Bombay. We have every hope to receive this allotment very soon and wish therefore, to communicate to you that our needs for electricity would be in the vicinity of 1,000.kW at Bagalkot itself.

We learn that the proposed Deccan Cements Company has already applied to you for definite quota of 1,600.kW contuos load. I am certain that if the Government of Bombay would think of extending the line from Gadag to Bagalkot, it would be very good proposition for the Government and it would also stimulate industry in the town of Bagalkot. According to our expectation the consumption of electric power in Bagalkot would not fall short of 3,000.kW continuos load. We, for our part, are willing to receive electric power from you and strongly request you to examine the proposal very carefully,.

We have made detailed calculation of costs and wish to submitt to you that the maximum limit that we can pay for the electric power at Bagalkot, would be not more than 0.6 anna per unit. Government would do well therefore to call up all the interested parties together for a discussion and thrash out the question of the rates of electrc power supplied. As we know that the Government is interested to supply electricity as cheap as possible, we do not suppose that we shall have any difficulty in arriving at a reasonable agreement.

Your Obedient Servant.,
For B.V.Bhoomraddi & Co.
Yours
B. V. Bhoomraddi

P.W.D.
File No. 2004/36
Inward No. 20377

Below P.W.D.,U.O.Rs.Nos.2004/36/19593, 2004/36/20377, 2004/36/2360 dated 10th, 13th and 16th May 1947 respectively.

Electric Grid Offices.

The approximate total load as mentioned in the applications from :-

1) Deccan Cement Co.,
2) Spinning Mills of Messrs.B.V.Bhoomraddi & Co.,
3) Power supply to Industries of Mr. S.S. Sakri.

is about 3000 MW. If sufficient power were available from Jog Power Scheme, the proposal to supply to the area could be considered after a decision is reached regarding Power Supply to Karnatak Area vide my second note dated 21-8-47. But from the present information it is learnt that the maximum Power Supply from Mysore Government will be limited to 10,000 H.P.(7500 K.W.) which would not be adequate to meet the requirements of Bagalkot, in addition to the requirements to Karnatak Area nearer to Jog.

+ File no 2004/36 II (under Sulman's U.O. No. M.P.W.D. dated 3.9.47)

2. As a long range programme the Power Supply to Bagalkot could be included in the Power distribution system of the Kalinadi Power Scheme, As there would be adequate capacity from the scheme to meet the requirements of all the load centres in the Karnatak Area.

3. In any case Power Supply from Jog would not be possible within the next five years & from Kalinadi within the next 8 to 10 years. As the Deccan Cement Co. except to put the plant in Bagalkot at the end of three years, they may be informed that they should make their own arrangements for the require power supply.

4. The other two applicants Messrs. B.V. Bhoomaraddi & Co. & S.S.Sakri, may be intimated that their requests for power have been

included in the load forecast for the Kalinadi Power Scheme.

5. The original applications are returned herewith.

El. Br. P. W. D.

Submitted with reference to the H. M's orders on pp 1, 5 & 9 ante.

2. The note of the El. Commr req: the use of fog power based on the investigation made by Dr. Ram Prasad is under + submn to the H. M. P. W. D. on the circumstances explained by the El. Commr and the remarks made in the following paras it is for consideration whether the parties concerned may be informed as suggested in paras 3 & 4 of the El. commr's note. Wb 11-12 Wb 11-12

3. The authority req'd by the applicants is at the following three places.

Bagalkot.	2,800 kW *
Guledgudd	100 kW p 5
Ilkal	100 kW p 5
	3,000 kW

The town of Bagalkot is at present served by a private licensee. The [illegible] capacity of the station

* Deccan Pl Cement 1600
New Sakore p 5 200
Messrs Bhoomreddi [illegible] p 9 1000
2800

2004/36
37/7/47

is however very small. As suggested by the El. Engr the Deccan cement Co will have to make their own arrangements for the reqd power supply unless the licensee is able to arrange arrangement to give them the reqd supply.

+ There are two wells of 81 ft. & 71 ft. respectively out of which the latter is in use at present.

4 The towns of Gulbarga & Bidar are included in the towns proposed to be electrified on the basis of small diesel stations in the first five year Electricity plan. According to the tentative programme made by the El. Engr these two towns are scheduled to receive supply in Febr 1949. The capacity of these stations would however be very small (being intended to give supply for lighting & small power purposes) at the outset.

v. As in the case of Rabkavi Chikkum etc, two diesel sets of the estimated 100 kw & 50 kw may be visited...

Submitted.

2. These papers deal with the applications from the following concerns for the supply of electric power from the Jog Falls. The approximate total load required by them is as detailed below:-

(1)	The Deccan Cement Co.	1600 kW at Bagalkot.
(2)	Spinning Mills of M/s. B.V. Bhoomraddi and Co.	1000 kW at "
(3)	Power Supply to Industries of Mr. S.S.Sakri.	400 kW) 200 at Bagalkot) 200 at Guledgud & Ilkal.
		3000 kW.

The load is required at the following places and its distribution is as under.

Bagalkot	2800 kW.
Guledgud.	100 kW.
Ilkal.	100 kW.
	3000 kW.

2. Further consideration of these applications was held over pending the decision on Dr. Ram Prasad's report on the utilization of Jog Power vide proceedings on pp. 13-15 ante. The decision on the report is that further consideration of the utilization of Jog Power should be taken up after the report of the Spl. Officer (Mr. T.K.Mirchandani) who has been appointed to investigate into the industrial potentiality of the four Dists. of Dharwar, Karwar, Belgaum and Bijapur and that of M/s. Associated Consulting Engineers on the preliminary investigations of the Kalinadi Hydro El. Project, are available. In the meanwhile the El.Commr. has been asked to investigate the possibility of supplying Jog Power off Harihar to the Southern Part of the Dharwar Dist. and negotiate with the Mysore Govt. regarding the rate of supply, etc.

3. From the report of the E.Commr. it will be seen that as long range programme the power supply to Bagalkot could be included in the power distribution system of the Kalinadi Power Scheme as there would be adequate capacity from the scheme to meet the requirements of all the load centres in the Karnatak Area. As

in any ....

in any case the power supply from Jog power would not be possible within the next five years and from Kalinadi within the next 8 to 10 years, the El. Commr. has advised that the Deccan Cement Co. may be informed that they should make their own arrangements for the required power, as they expect to put their plant into service at the end of three years. As regards the other two applicants M/s. B.V. Bhoomraddi and Co. and S.S.Sakri, he advised that they may be intimated that their request for power has been included in the load forecast for the Kalinadi Power Scheme.

4. Besides Bagalkot Mr. S.S.Sakri requires supply of 100kW each at Guledgud and Ilkal, which are proposed to be electrified under the Nursery Scheme. As these power stations are intended to give supply for lighting and small power purposes the capacity of these stations would be very small. Besides the view of the rise in the cost of materials and and the revised reduced allotment for the Grid Scheme, it is doubtful whether the El.Commr. will be able to give supply to these towns in February 1949 as originaly proposed by him. The schemes for these towns have so far not received from him. In these circumstances Govt. need not commit in any way for the supply of electricity to these applicants who may perhaps be informed as per draft put up for approval and submission and thereafter the pps. may be refd. u.o. to the El.Commr. with a request to elucidate the position regarding the supply of electric power to Guledgud and Ilkal.

Copy of extract paragraph 4 dated the 7th July, 1948, from Messrs.Hanebennur Ginning and Trading Company Limited.

Supply of cheap electrical energy from the Joga-Falls Generation Centre. By far this would be a most effective filling to our own industry as well as other prospective industries and agricultural development in these parts. The project is rich in potentialities of a far reaching magnitude for industrial and agricultural expansion resulting in immense benefits to the public as well as to Government by way of income tax and other revenue to a considerable extent. People of these sides are anxiously awaiting the projected supply of electrical energy from the Joga-Falls Generating Centre. The earlier it is taken up, the better it would be for all concerned. Factory owners as well as agriculturists would guarantee consumption of electrical energy upto, 3000 kilo-watts. The demand for energy in the surrounding areas would go on increasing, and I assure Government that th project is sure to be one of the most profitable investments on the part of Government. We, the people of these parts, therefore, humbly request Government kindly to expedite supply of electrical energy.
